 L-L-J-H! English All the worst crimes of poetry (except perhaps the confessional) are on display in

The book you are looking at is the largest **Anthology of Concrete Poetry** to appear to date, and the first major one to be published in the United States. **Edited by Emmett Williams**, one of the founders of the movement, and with the over-300 selections translated wherever possible from their original languages and glossed where translation would not be feasible, all supplemented by detailed biographies of the poets, the publishers of **Something Else Press, Inc.** take great pride in presenting a cross-section of this most active of modern poetry movements and in introducing so many major writers from so many countries between these covers for the first time to the American reading public.
