

A History Of India As It Happened Not As It Has Been Written By François Gautier In the early eighties he began freelancing in India for different publications and finally ended up being the correspondent in South Asia for the Geneva based « Journal de Geneve ». He was also a regular columnist for Indian newspapers initially for Blitz Bombay and later for Hindustan Times the 'Ferengi's column" in the Indian Express the "French Connection" column in the Pioneer Rediff New Indian Express Dainik Jagran etc. In the early eighties he began freelancing in India for different publications and finally ended up being the correspondent in South Asia for the Geneva based « Journal de Geneve ». He was also a regular columnist for Indian newspapers initially for Blitz Bombay and later for Hindustan Times the 'Ferengi's column" in the Indian Express the "French Connection" column in the Pioneer Rediff New Indian Express Dainik Jagran etc. Amongst them: an exhibition on the persecuted minorities of Bangladesh another one on the plight of Kashmiri Pandits (which was shown to the US Congress in 2005) a film on the trauma of 1947 and another one on the testimonies of the Mumbai train bombings of 2006. Il est l'auteur du livre Un Autre Regard sur l'Inde (1999 Editions du Tricorne) pour lequel il fut invité à Bouillon de Culture en mai 2000 (le livre a été réédité trois fois depuis) de Swami PDG et moine hindou (Editions J. Résidant en Inde depuis 35 ans et marié à une Indienne François Gautier est aujourd'hui le rédacteur en Chef de la Nouvelle Revue de l'Inde publiée par les Editions l'Harmattan et directeur de collection chez le même éditeur. At one time they ruled the entire world! Latest archaeological discoveries and evidences will prove this! According to these discoveries and evidences Indian history has to be rewritten by young historians who love to digest the truth. Hardcover I'm amazed that many people in other countries today understand and appreciate the values of Vedas and the Sanatan Dharma and Hinduism while more than half of Indian Hindus themselves have lost touch with the words of their own Gods and Goddesses their own rishis and gurus. This brings me to make a request to all the leaders of our times like Sri Sri or Sadhguru ji to take upon themselves to explain the same principles to us in a simpler manner with today's background. But I rightly agree with the author that we need to go back to the original teachings and bring back our original values to keep ourselves in balance when the world around us is losing theirs. If it takes for our government to rewrite our history books or revise syllabus of our educational institutions sorry to be frank more than mere foolishness! Coming to the book the book clearly mentions the purpose and it stands out to that: I may not personally completely agree that Sanskrit can be 100% revived but it can become a part of our learning again. Throughout the book I witnessed the authors love and respect for Hinduism's values and beliefs and that has influenced me immensely. I cannot thank him enough for his views and for his directions, Its time we revisit our roots and the soul of our motherland, Contains many more facts that are not taught in the academic syllabus, Hardcover A good treatise on the history of Bharat or Hindustan. Fairly balanced overall but points the finger at loot of this country and persecution by people who have been eulogised in history books written by the colonial masters. Hardcover A History Of India As It Happened Not As It Has Been Written

Too biased, Hardcover There are a few historians in the comment section who claim to know history better than historians. They also distribute the qualification letters to historians - the ones able and those not capable. In 1993 he switched to Le Figaro one of France's leading newspapers for which he worked exclusively for eight years, Gautier is now the editor in chief of the Paris based La Revue

de l'Inde and a director of a book collection on India with the same publisher, In 1993 he switched to Le Figaro one of France's leading newspapers for which he worked exclusively for eight years, Gautier is now the editor in chief of the Paris based La Revue de l'Inde and a director of a book collection on India with the same publisher: Along with his wife Namrita he is also the trustee founder of FACT India which does exhibitions and commissions films documenting Human Rights abuse in South Asia: La description en français: Ecrivain et journaliste français François Gautier fut le correspondant en Inde et en Asie du sud du Figaro durant dix ans. Delville 2003 8000 exemplaires vendus) de La Caravane Intérieure (Les Belles Lettres Paris 2005) et de Français en Inde (France Loisirs 2008). {site_link} A must read book on what exactly happened in Indian history. The intent of reading history is to know our culture and to know the lessons learnt from the events, This book helps in understanding the actual events happened and their causes/results: It thus separates the history from what we know from tweaked writings from the actual events. Hardcover Each and every person should read this book to understand the truth of Indian history. So far Indian historians follow the writings of European colonizers who downgraded Indian history for many years, They divided Indian people against one another like caste against castes Aryans against Dravidians North Indians against South Indians: This book will lay foundation for such generation of young historians, Matlock said "One of the greatest mistakes a human being can make is to read the Hindu holy books...as fiction. Of course those books especially the Vedas contain apparently implausible information...": When I look at India today I'm both sad and happy all at the same time, Firstly I'm immensely indebted to the author for bringing out the original ethos of Sanatan Dharma and Hinduism, As I read through a lot of my old learning from my childhood came back to me and I'm glad it did: Somewhere while running in today's rat race I had forgotten or lost touch with my sense of my roots, Secondly a lot of the teachings of the Vedas Upanishads and other texts are lost to us for the exact reasons that the author explained in the book: Not all of us be expected to understand the aspects of spirituality in today's context given the decades of misinformation that has been peddled around our great texts. Thirdly I feel the India the author saw when he wrote the book and the India of today are slightly different though I agree not majorly, Today's Indians have a sense of pride and nationalism that was missing even as less as 5-7 years back. We have a nation that wants to look forward a nation that has secured a respectable position in world economics and politics: Even in technology our brilliant young minds have carved a niche making India the hotbed for innovation and not just backend automations and outsourcing. There is no doubt India is emerging as an economic a political and a military superpower but why should we not be the natural leaders in spiritualism as well: Lastly I strongly believe what the author has recommended - we must bring back our original teachings into our everyday lives, The author might have tried his best to concisely compress the prolonged history of a civilisation older than the concept of civilisation itself he could not succeed entirely: However the book is better than many fictional books written by 'qualified' historians like Thapars and Jhas, You will not be belied into believing what was not there: Hardcover Drops on the face when it comes to the contents of the book compared to the title, Hardcover A very important book happy to have picked this up! Hardcover.
