

The Seat Filler By Sariah Wilson

I'm way too lazy for screenshots English Awesome slow burn romance with an A-list leading man! The following ratings are out of 5: Narration: [] [] [] [] [] Romance: [] [] [] [] [] Heat/Steam: [] [] [] Story/Plot: [] [] [] [] [] World building: [] [] [] [] [] Character development: [] [] [] [] [] ♀ [] [] [] [] [] ♂ The heroine: Juliet Nolan - Juliet recently started her own mobile dog grooming business and is helping out a friend by working as a "Seat Filler" at a major Hollywood awards show. I could never do this to them like imagine if Adam Driver ever saw this? I just know in this nutjob's head she's like omg Adam would find this ROMANTIC and he would instantly leave his wife for me!!! Sorry sis but that isn't happening and I hope he gets that restraining order asap. What odds does romance have without that momentous stupendous once-in-a-lifetime first smooch? Patient empathetic and carrying personal burdens of his own Noah suggests a remedy: they rehearse. The Seat Filler adam driver's not gonna fuck you! English my client has asked me to rate this book 1 star and serve the author with a restraining order best regards - adam driver's publicist English I'll say more later cause I read this in the car (and I'm still here) but this was yikes city even before I got to the acknowledgements. And then I found out mid read that the author compared her son's autism diagnosis to a terminal illness and :/ Basically this is a self-insert Adam Driver romance and I feel so uncomfortable. The writing was bad with too much weight placed on simply telling the reader what's in front of them and no focus placed on the prose sounding like anything other than a google translation of travel directions. Which to comment on the writing this guy acts nothing like Adam or a character of his I've seen (at this point is that a good thing? Iunno I want nothing to do with the self insert aspect). I gotta stop talking about this but yeah - the author said ridiculously ableist things and made her son's autism all about her she wrote a creepy ass book that makes me glad Adam driver has a security team and it's not even a good book. This is told by the heroine's POV so there is only a female narrator but she has a great voice which fits Juliet perfectly she has just the right amount of innocence and sass. This was a great book to listen to via audiobook! Blog|Goodreads|Facebook|Instagram|Twitter|BookBub English the only good thing to come out of this book is the 50 followers i gained from live tweeting it English this was already bad and then at 60% i realized it was fucking adam driver fanfiction and nearly quit. There are lines we should have as fans and this woman not only crossed it she back flipped over that and is proud to be this crazed stalker??? This is a grown woman MARRIED and she does this shit?? There is no rational explanation it wasn't good. She acts so quirky about eating her snickers and watching tv like ??? What kind of dumb shit is this she's an adult and so many people are like this you don't have to be so quirky weird and make your entire personality around how you like chocolate. To top off how fucked this author is- she also recently made ableist comments about her son's autism like can we just throw the whole person away? English Based on the author shipping herself with a real person/celebrity. English Warning- lots of great chemistry romantic banter scrumptious hero and endearing heroine This may be Sariah's best book yet and that's saying a lot because all her books are so good! I can't even form words I just want to go and read the book again. for writing one of the cutest swooniest books ever! The story of an every-day normal girl with believable issues and an intriguing sweet and handsome-in-his-own-right actor captured my interest and hooked me from the very first page. The whole cast of characters is perfect for this story and meshed together in an amazing way that drew me right in and didn't let me go--I think this book must be laced with something addictive because I'm feeling a book hangover right about now: The Hero(es): Noah Douglas - An A-list movie star that is in the running for many of the major awards during the current award season, He has been an actor since he was a child and spent most of his years growing up on a TV show that was eerily similar to Saved by the Bell. Then he joined the military for a few years and returned and transitioned to doing movies: He was recently in a hugely popular trilogy called Duel of the Fae. The Story: Juliet had a major crush on Noah throughout her teenage years.

This is just fucking weird: Actors are real people and the thought of ever making an actor I admire uncomfortable breaks my heart: Literally in this book the character gets exposed as being a fan of

the actor guy and he literally finds it romantic. Do you smell something yes that's me I puked because of how gross I find this all. As for the book and romance itself.

The movie star and the dog groomer are one kiss away from the perfect love story: That's the hiccup in a warm and witty romance by the bestselling author of Roommaid. It's one of Hollywood's biggest nights when she volunteers as a seat filler and winds up next to movie heartthrob Noah freaking Douglas. Tongue tied and toes curling in her pink Converse she pretends that she doesn't have a clue who he is, She's pretty and unpretentious loves his dog and is not a worshipping fan, No way Noah's giving up on her even if his affectionate pursuit comes with a bump: Juliet has a pathological fear of kissing and the disappointments that follow, As for that cue-the-orchestra-and-roll-credits happy ending? It might take more than practice to make it perfect: I felt gross as a (definitely casual compared to this) Adam driver fan reading this cause it was just - the character read nothing like him but all the factoids were him. I know tidbits about his upbringing and military history from interviews and seeing it all here only with names changed and the tiniest of details edited made me physically recoil, This isn't a fiction book this is a daydream about a real man and I don't think it should have been published: But when there's an entire twitter thread exploring the MANY ways this book crosses the line it just becomes disgusting and creepy to me. Not to mention the fucking ACKNOWLEDGMENTS- Adam honey get a restraining order please this is too MUCH: The romance was weird and awkward- I couldn't buy the chemistry at all even separated from the complete absurdity of the character. It's just that for a book literally ripping off his life he acts like some random dude with no vibes of the actual man at all: Probably because the author met him for 5 seconds at an award show and that's it: Twitter thread here that I showed my friends when I couldn't explain the book well enough myself: <https://twitter.com/bensreys>. Thank you to bensreys for documenting this but when she meets him at the awards show he is arrogant and condescending so she pretends not to know who Noah is. Noah is immediately intrigued by this girl in a fancy dress and pink converse high tops who is snarky and unimpressed by him. I really enjoyed this story it was a clean romance with a lot of steam, Juliet had a very bad experience when she was young and has a very real fear of kissing. It is so bad that the few times she tried she has experienced panic attacks. So Noah offers to help Juliet with her problem and it leads to some pretty steamy kissing scenes, She also did the male voice perfectly with a deep enough voice to make it sound great: but morbid curiosity drove me on and i spent the last fifty pages just whispering "oh jesus christ gross" to myself in the break room: English I got a stomach ache from how fucking creepy this author is, The Seat Filler is about a dog groomer who while helping out her friend ends up as a seat filler at an award show and happens to sit next to her celebrity crush. Pretending she doesn't know who he is she plays uninterested while he becomes more interested: This is the author's published self-insert fanfiction where she falls in love with the actor Adam Driver and it's disturbing to say the least, She takes literally every public known fact about him even his trauma and uses it, The author doesn't even hide this fact and she's absolutely unhinged: The acknowledgements are even worse and I swear to god Adam Driver needs a restraining order from this woman. There are actors that I love too but this level is break into your house and hide in your closet level not, watch every thing they are in and retweet memes about them level, They had no chemistry and yet kept ending up together at every moment, Every conversation they had I was just cringing at how fanfictiony it really was?? Like you could at least try to make this not suck but okay: I really spent most of the book just cringing and feeling really uncomfortable that such a book exists. The writing was SO bad and all of the dialogue was nails on a chalkboard. The MC (idk her name but it's probably Sariah) was so annoying oh my god I just wanted to fight her: Loved the storyline loved the characters loved all the swoony and I mean S. kisses! Did I mention the swoony kisses? But seriously the love story is so great: Noah and Juliet have great chemistry fun banter and a genuine connection: Like drop everything you will not want to miss out on this book. I'll write a full review closer to release date after I've probably read it a few more times, did someone mention swoony kisses yet?Language: NoneViolence: None2021 Swoony Nominee: <https://tinyurl.com/y593ce67> English The swoon is

strong with this one! And the award goes to, I love how witty and true to herself Juliet is and the banter and attraction between Juliet and Noah completely swept me away: This is hands-down one of the swooniest romances I've ever read, The connection between Noah and Juliet and the super dreamy kisses kept me up way too late and left me floating for a long time afterward. The Seat Filler is definitely a book that deserves to be re-read and I can't wait to enjoy it all over again: Content: mild+ romance (swoony kissing light innuendo) *I received a complimentary copy through Netgalley, All opinions expressed are my own and were voluntarily given. The meet-cute award goes to dog groomer Juliet Nolan. It's the only way to keep from swooning. The lessons begin. The guards come down. But there's another hitch they weren't betting on. Way too weird. A few similarities here or there? [Fine.com/bensreys/status/1](https://fine.com/bensreys/status/1). The narrator is terrific. Soon they start a creepy ass romance. I could give a better blurb but honestly fuck this book. It felt like a parody and yet it was dead serious. The romance made no sense and was so awkward. Huge cringe. W.O.O.N.Y. Y'all need to pre-order your copies right now. *happy sigh* Content: Romance: Clean. Sariah Wilson. I couldn't get enough.* English
