Solving Modern Problems with a Stone-Age Brain by Douglas T Kenrick and David E Lundberg-Kenrick offers an interesting and fairly convincing argument using evolutionary biology to explain some of our more questionable psychological and mental problems. **Solving Modern Problems With a Stone-Age brainbend** On the plus side their notes offer me and any reader the opportunity to look into the primary sources more closely and also find arguments against using evolutionary theory in such a sweeping manner. **Solving modern problems with a stone-age braing system** On a more personal level there were places where the writers' own biases came through and I found them rather off-putting at best and to a large extent discounted whatever credibility they had for me. **Solving Modern Problems With a Stone-Age brainblower** If you have a flame war with someone and you're not going to go into detail because the point of your story is that you decided to avoid such situations and deleted your accounts is it necessary to tell what type of account the other person had unless you were signaling what type of group you belong to? And many other subtle indicators so readers of the same (limited) scope will spot their flags. **Solving Modern Problems With a Stone-Age brainly pdf** But I do think they offer whether intentionally or not father and son authors Doug Kenrick and David Lundberg-Kenrick pinpoint the dangers of stone-age problem solving for our lives today and present a new systematic way to survive and be happy in the modern world. **Solving Modern Problems With a Stone-Age brainfeed** Over millennia we humans have evolved a set of motivational systems to help us solve the seven basic problems of surviving protecting ourselves from dangerous others forming friendships winning respect attracting mates hanging onto mates and caring for our families. **Solving Modern Problems With a Stone-Age brainbase** However the saber-tooth tigers and rival tribes that once threatened us have been replaced by marketers peddling sugar-laden foods pundits fanning the culture war flames and

payday loan companies scamming those who can least afford it. **Solving Modern Problems With a Stone-Age brainbomb** Through a series of engaging narratives and science-based life tips this book helps us see past our electronics and lattes and gain helpful insights into achieving the life we want. **Solving Modern Problems With a Stone-Age brainbase** He has edited several books on evolutionary psychology contributed chapters to the Handbook of Social Psychology and the Handbook of Evolutionary Psychology and been an author of two multi edition textbooks (Psychology with John Seamon; and Social Psychology: Goals in Interaction with Steven Neuberg and Robert B:
